

# AC2000 SnapShell Interface

## SnapShell Passport and ID Scanner

### Features that make a difference:

- Improve the efficiency of your identity registration and onboarding mechanism with data capture
- Reads all passports and ID-sized documents from over 90 countries
- Extracts relevant textual data from documents
- Reduced data input errors
- Scanning process fully integrated with AC2000

The AC2000 system contains a fully integrated passport and ID scanner using the SnapShell® Passport scanners. This allows the user to capture a cardholder's passport or driver's license textual information (surname / forename/ document ID / issue date) onto the AC2000 Visitors application.

The complete solution reads and parses information from the document with OCR (Optical Character Recognition) in supported countries. This system is fast, highly accurate, has no moving parts and is easy to use creating a highly efficient visitor registration process.

### Easy to Use

The SnapShell scanner captures cardholder details at the press of a button in the AC2000 SnapShell interface and only requires a USB 2.0 connection.

This integration improves the efficiency of your identity registration and onboarding mechanism with data capture which reduces data input errors.

SnapShell Passport Scanner
